

PRESS RELEASE

Paris, June 19th, 2026

Naval Group, MESKO and TELESYSTEM sign a sea firing trials agreement for demonstration

On 19th June 2026, Naval Group, MESKO and TELESYSTEM signed an agreement to demonstrate MESKO's Piorun missile capacity onto Naval Group's Rampart during future naval exercises. This agreement marks the first step of a mutually beneficial strategic cooperation intended to support the future integration of the missile into the launching system.

In an asymmetric and complex operational environment, providing innovative options to manage different type of threats remains the highest priority for Naval Group, MESKO and TELESYSTEM. The three companies will explore the integration of PIORUN missile onto the Rampart to offer an integrated European solution for countering conventional and asymetrics threats, adressing naval, air and land forces.

With complementary skills and know-how in near-field combat, Naval Group will bring its experience in integrating weapons, weapons launching systems and equipment on warships, while MESKO and TELESYSTEM will contribute with their expertises in the production and supply of high technology missile.

MESKO's Piorun is a modern short-range surface to air missile designed to counter low flying aerial threats, including aircrafts, helicopters, UAVs and winged rockets. The missile has a fuse equipped with a proximity sensor, which allows for destroying the target in case of its close passing.

About MESKO

MESKO is the producer of world-class military products with 100 years of manufacturing experience. The core range of MESKO's activities covers production for the national defence and security purposes. Our products are used by Polish Armed Forces and entities responsible for national security. MESKO is also an eligible supplier of military products for NATO troops. The company possesses modern technology for the production of rockets and ammunition, including sub-caliber ammunition, as well as infrastructure for the demilitarization of outdated combat resources.

About TELESYSTEM

Centrum Rozwojowo-Wdrożeniowe TELESYSTEM-Mesko Sp. z o.o. is a leader in the Polish defense sector for advanced solutions in optoelectronics, on-board electronics, and guidance systems. The enterprise plays a crucial role in the national security architecture, delivering innovative components that directly determine the effectiveness of modern weaponry.

The company's flagship area of activity is the design and production of precise target tracking systems. TELESYSTEM is the creator and exclusive supplier of infrared seekers for the combat-proven PIORUN and GROM man-portable air-defense systems (MANPADS). The company is also responsible for the development and supply of laser guidance modules, which form the foundation of the PIRAT lightweight anti-tank system and the domestic Precision Munitions (APR). Complementing the company's innovative portfolio are modern laser guidance systems, guaranteeing complete immunity to radio-electronic interference (EWI) on the modern battlefield.

The fundamental value that TELESYSTEM brings to the Polish defense industry is ensuring the nation's technological sovereignty. Possessing its own, globally unique research and development (R&D) facilities and a full production cycle guarantees Poland's independence from foreign suppliers in the segment of the most advanced missile technologies.

In response to a surge in demand from the Polish Armed Forces and export markets, the company is currently implementing an extensive investment program. The infrastructure expansion, valued at nearly 150 million PLN, enables the enterprise to smoothly transition to large-scale production. Simultaneously, the company is continuously engaged in developing next-generation solutions, consistently strengthening its position among the European leaders in advanced defense technologies.

About Naval Group

As an international naval defence player, Naval Group is a partner for countries seeking to maintain control of their maritime sovereignty. Naval Group develops innovative solutions to meet its customers' requirements. The group is present throughout the entire life cycle of vessels. It designs, produces, equips, integrates, supports and upgrades submarines and surface ships, as well as their systems and equipment, right up to the final phases of deconstruction and dismantling. Naval Group's unique know-how in autonomous systems, underwater weapons and drones place it in pole position to become European leader in the sector. As a high-tech company, it draws on its outstanding expertise, unique design and production resources and ability to establish strategic partnerships, in particular within the framework of transfers of technology. It also provides shipyard and naval base services.

Ever mindful of the issues concerning corporate social responsibility (CSR), Naval Group is a signatory to the United Nations Global Compact. Located on five continents, the group generates revenue of 4.679 billion euros and has 17,170 employees (Full-Time Equivalent average annual workforce - figures as on 31 December 2025).
