

GTT Marine to equip the PETRONAS-chartered LNG carrier fleet with its integrated suite of digital vessel performance solutions

Paris, 23 July 2026 – GTT Marine, a division of the GTT Group, announces that it will equip the PETRONAS-chartered LNG carrier fleet with its suite of digital solutions. As part of this collaboration, GTT Marine will support PETRONAS in implementing an integrated approach to overall vessel performance, helping to enhance operational efficiency, control costs and reduce emissions. This commitment can also be extended to accommodate the future expansion of the PETRONAS-chartered LNG carrier fleet. The suite of solutions includes:

- **Monitoring vessel performance:** GTT Marine's data acquisition capability enables the collection, structuring and analysis of operational data, combining noon-reports with high-frequency sensor data. That data is then turned into actionable insight through Vesper Insights, giving crews and fleet management teams a clearer, evidence-based view of vessel performance over time and helping them prioritise technical, operational and maintenance actions.
- **Optimising voyages and reducing emissions:** the scope of services will also cover voyage optimisation, combining weather data, vessel performance models and digital twins, with continuous 24/7 support from GTT Marine's Fleet Centre. Together, these capabilities give crews and shore teams additional decision-support for route planning, fuel consumption management and emissions reduction.
- **Enhancing visibility over cargo operations:** complementing these performance and voyage optimisation services, cargo management monitoring solutions will provide enhanced visibility into cargo operations and associated vessel operations.

Casper Jensen, CEO of GTT Marine, declared: *"This agreement with PETRONAS is a strong validation of what we've built by bringing Danelec, Ascenz Marorka and Vessel Performance Solutions together under GTT Marine. Today, we deliver data acquisition, performance analytics, and voyage optimisation as one integrated suite, backed by our Fleet Centre around the clock. That is the real value of combining these three companies' expertise: moving from fragmented digital tools to integrated, data-driven decision-making."*

About GTT Marine

GTT Marine is a leading provider of advanced technologies and digital solutions that optimise vessel performance and support the maritime industry's decarbonisation journey. Part of the GTT Group, a global technology and engineering expert in liquefied gas containment technologies and low-carbon maritime solutions, GTT Marine connects ship and shore through a fully agnostic operational ecosystem powered by trusted vessel data. Its portfolio combines onboard technologies - including Voyage Data Recorders (VDRs), Shaft Power Meters, and data infrastructure - with digital solutions for voyage optimisation, fuel efficiency, emissions compliance, and AI-driven performance analytics. With more than 17,000 solutions deployed across vessels worldwide, GTT Marine helps ship-owners and operators make smarter operational decisions, simplify fleet management, and generate measurable operational and commercial gains.

About GTT

GTT is a technology and engineering group with expertise in the design and development of cryogenic membrane containment systems for use in the transport and storage of liquefied gases. Over the past 60 years, the GTT Group has designed and developed, to the highest standards of excellence, some of the most innovative technologies used in LNG carriers, floating terminals, onshore storage tanks and multi-gas carriers. As part of its commitment to building a sustainable world, GTT develops new solutions designed to support ship-owners and energy providers in their journey towards a decarbonised future. As such, the Group offers systems designed to enable commercial vessels to use LNG as fuel, develops cutting-edge digital solutions to enhance vessels' economic and environmental performance, and actively pursues innovation in the field of low-carbon solutions.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in the CAC Next 20, SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
