Diades Marine selected by Airbus Helicopters to supply the C-RANGER 300 maritime surveillance radar for the U070

Diades Marine has been selected by Airbus Helicopters to supply the C-RANGER 300 maritime surveillance radar for the U070, covering manufacture, supply and support.

The C-RANGER radar family is engineered to meet operational needs, combining appropriately sized systems with competitive maritime surveillance solutions tailored to emerging UAV platforms.

“We thank Airbus for their renewed confidence in Diades Marine since the first operational trials. It recognises our teams' hard work and the performance we have demonstrated on the field. This contract marks an important milestone in the deployment of the new generation of C-RANGER radars in France and internationally. We are proud to support Airbus in delivering key solutions to address today's and tomorrow's operational challenges,” said Olivier Lacrouts, President of DIADES Group.

Diades Marine designs and manufactures sovereign, mission-oriented maritime surveillance radars.
