Press release

GTT Energy receives an order from Hudong-Zhonghua Shipbuilding for the tank design of five new LNG Carriers

Paris, 17 November 2026 – GTT Energy, the Group business unit dedicated to containment and energy management systems, announces that it has received, in the fourth quarter of 2026, an order from Hudong-Zhonghua Shipbuilding for the tank design of five new Liquefied Natural Gas Carriers (LNGCs) on behalf of MISC, the ship-owner.

GTT will design the cryogenic tanks of the vessels, which will each offer a total capacity of 174,000 m³. The tanks will be fitted with the NO96 Super+ membrane containment system developed by GTT.

Delivery of the vessels is expected between the fourth quarter 2029 and the third quarter 2030.

About GTT

GTT is a technology and engineering group with expertise in the design and development of cryogenic membrane containment systems for use in the transport and storage of liquefied gases. Over the past 60 years, the GTT Group has designed and developed, to the highest standards of excellence, some of the most innovative technologies used in LNG carriers, floating terminals, onshore storage tanks and multi-gas carriers. As part of its commitment to building a sustainable world, GTT develops new solutions designed to support ship-owners and energy providers in their journey towards a decarbonised future. As such, the Group offers systems designed to enable commercial vessels to use LNG as fuel, develops cutting-edge digital solutions to enhance vessels' economic and environmental performance, and actively pursues innovation in the field of low-carbon solutions.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in the CAC Next 20, SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
